

Various addresses : for One Housing Group / Citystyle Living : value £varies : RIBA Stages A-L
TM Architects were commissioned to work on a series of projects adapting existing affordable rent properties to dwellings for market rent. The initiative will provide cross-funding for affordable housing provision elsewhere. The properties vary from small studio apartments to whole houses and include a listed building dating from 1708 in Great Ormond Street. The scope of work varies according to property type and location and includes a loft conversion, rear extension, interior design and selection of fittings and fixtures. The contracts are let on very tight budgets but with a brief to maximise market values. The contracts are traditional with TM Architects being involved from inception to completion.
